PORTIS: Port Cities – Innovation for Sustainability

The CIVITAS PORTIS project plans to implement 49 measures in the PORTIS cities of Antwerp, Aberdeen, Trieste, Constanta and Klaipeda.

Follower City – Ningbo in China

Aberdeen partners ACC, Nestrans, Ab’shire, Aberdeen Harbour Board and RGU

University of Aberdeen coordinating evaluation (for whole project)
CIVITAS PORTIS

• A four year project (From 1st Sept 2016-end Nov 2020)

• 100% funded by Horizon 2020 for Aberdeen and local partners

• Approx £3.2 million to Aberdeen & Local Partners

• Overall budget of €17,678,400

• EU contribution of €16,376,775 (92.6% of total)

• Final Conference will be held in Aberdeen 24th to 26th June 2020
PORTIS-Measure Overview
PORTIS Within Wider Landscape
PORTIS Evaluation

• Many evaluation methods have been developed (e.g. Sustrans)
• They all aim to explore and evaluate the effects of interventions and measures, including at city/port level
• In PORTIS, we have utilised indicators (from Civitas) which aim to capture the before/after effects of the project
• We are looking at both the measures and the processes
• Further evaluation has involved studies to explore walking and cycling in Aberdeen
• Therefore, the evaluation has included elements of quantitative and qualitative research, including surveys, interviews, workshops and large scale date collection and capture
Thank you!
